

Subject: **Apple 0-Days Patches for MacOS / IOS (Advisory No. 11)**

1. Apple rushed out patches for two zero-days affecting macOS and iOS that allow a threat actor to disrupt or access kernel activity.
2. Vulnerabilities CVE-2022-22675 for macOS / iOS and CVE-2022-22674 for macOS are identified. Users are urged to update devices as soon as possible to patch the bugs.
