

Subject: - **Cyber Security Advisory - Oracle and Juniper Releases July 2022 Critical Patch Update (Advisory No. 36)**

Context. Oracle and Juniper have released Critical Patch Updates for July, 2022 to address numerous vulnerabilities across their multiple products. As a result of existing vulnerabilities, an attacker can remotely exploit these vulnerabilities to take control of an affected system. Users and administrators are requested to examine and apply necessary updates as per recommendations mentioned below.

2. **Recommendations**

- a. **Oracle.** Critical Patch Update contains 349x new security patches of Oracle product facilities and are available at the URL oracle.com/security-alerts/cpujul2022.html (Oracle July 2022 Critical Patch Update). Users and administrators are advised to download and apply the necessary updates.
- b. **Juniper.** Juniper's multiple products security patches are available at supportportal.juniper.net (Juniper Networks security advisories page). Users and administrators are advised to download and apply necessary updates.
